

# Swiss COSMO User Workshop

1 November 2012

## Goal

This Swiss COSMO User Workshop is intended as a platform to meet other COSMO users and get to know each other. This special edition consists of a set of short talks (about 5 minutes and 5 minutes discussion), giving the opportunity to everybody to present him-/herself, his/her work and a problem encountered when using the COSMO model. These talks have no title.

Few people also have the opportunity to give an extended talk to present the work done with COSMO in a whole group or in the Consortium, give information about plans or on-going projects, show some results or introduce meaningful tools in the COSMO context.

## Location

ETH, CHN building, P12 room, Universitätstrasse 16, 8092 Zürich
